For the attention of the Hiring Team

Application for a Financial Controller position

Dear Hiring Team,

Having completed an MBA in Management Control and Audit, I am seeking a financial controlling position where I can contribute to reliable reporting, budget monitoring and informed business decisions. My experience at Hachette Livre, Diagoris and Carrefour has taught me to connect financial analysis with operational needs and turn data into clear, practical insights.

At Hachette Livre, I helped monitor nine IT projects with a combined budget of €8.1 million. By analysing variances and identifying improvements with management, I contributed to a 30% reduction in forecast-to-actual variance. I also automated Excel and Power BI reports, achieving 50% time savings. These responsibilities strengthened both my analytical discipline and my attention to the consistency and usefulness of financial information.

Alongside reporting, I coordinated quotations, purchase orders, invoices and disputes with suppliers, accounting and financial controlling teams. I particularly value this collaborative aspect of the role: understanding colleagues' priorities, ensuring reliable information flows and improving the processes that support day-to-day decisions.

My internship at Diagoris involved analysing more than thirty companies and preparing financial summaries for management. At Carrefour, monitoring cash flow, working capital and margins gave me a complementary view of operational performance. I would welcome the opportunity to apply these skills to your team's budgeting, reporting and performance analysis needs, while continuing to develop my expertise.

I would be pleased to discuss your priorities and how my experience could contribute to your finance function. Thank you for considering my application. I look forward to the opportunity to speak with you.

Yours sincerely,

Eya Mahjoub
